

Healthcare has become one of the most highly regulated industries in the United States and audits of healthcare providers by the Office of the Inspector General (OIG) and the Office of Medicaid Inspector General (OMIG) reveal the need for a comprehensive compliance program that will measure up to the critical eye of governing agency oversight.

Our compliance reviews are designed to measure the effectiveness of your compliance program, policies, and procedures through a comprehensive 3-Step process. We will collaborate with you to understand your current state, identify areas needing improvement, and revitalize your compliance needs.
